

Call for Participants

NeuroCatch Inc. is looking for individuals 19 - 65 years of age who would like to participate in ground breaking research, investigating the variability of certain brain responses.

The brain responses will be measured through the NeuroCatch Platform™, an investigational medical device system. Which uses a 6-min EEG scan to measure brain responses to certain audio stimuli. Participants are required to come in once a week for 4 weeks.

PAID STUDY CALLING FOR PARTICIPANTS

NeuroCatch Inc. is looking for individuals 19 to 65 years of age who would like to participate in ground-breaking research, investigating the variability of certain brain responses.

Expected duration:

This study requires that you come to our clinic once per week over 4 weeks for approximately 1 hour each time.

Procedures	Screening Visit	Study Visit 1	Study Visit 2	Study Visit 3	Study Visit 4
Incoming form	X	X			
Eligibility criteria	X	X			
Pregnancy test	X				
Demographics ^a	X				
Brain Scan ^b		X	X	X	X

^a date of birth and gender

^b repeated 3 times with 5 minute break between each session; for each assessment during one visit three different audio sequences will be played

Eligibility:

To participate in this study, you should have normal hearing and be able to keep your still for 6 minutes.

You will NOT be able to participate in this study if you:

- Are not fluent in English language
- Have a clinically documented hearing issues, a metal or plastic implants in skull, or a chronic neurological disorder (e.g. Stroke, Multiple Sclerosis (MS), etc.)

Study Location:

HealthTech Connex Center for Neurology Studies
Suite 201, City Centre 1, 13737 96 Ave, Surrey, BC, V3V 0C6

The NeuroCatch Platform™ Assessment:

The NeuroCatch Platform™, an investigational medical device system developed by NeuroCatch Inc., consists of software and hardware that captures brain health information.

- An 8-channel EEG cap is used to record your brain activity. Preparation time (applying the cap) is about 5-10 minutes.
- Your brain activity will be recorded while you listen to a 6-minute audio sequence. This will happen 3 times in total during each for the 4 visits. You will get a 5-minute break between each recording session.

The risks are about the same as you may experience in a hair salon.

What you get for your time:

Upon successful completion of the study, you will receive \$150 at the end of study visit 4.

If you have any questions, concerns, or interest in participating in the study, please contact: Natasha Campbell (natashacampbell@healthtechconnex.com; 778-874-7758)
