

## YOU ARE INVITED TO PARTICIPATE IN A RESEARCH STUDY

We are looking for volunteers to join a research study using the NeuroCatch Platform™, an investigational medical device, to assess what brainwaves look like across different age groups.

Using the NeuroCatch™ Platform, a portable EEG (electroencephalograph) with non-invasive scalp electrodes, we will record your brain waves and analyze sensory, attention and language processing. The goal of this study is to develop a reference database for the NeuroCatch™ Platform.

During the study, you will be asked to complete a questionnaire, play games on a tablet to assess cognitive performance, and sit through one 6-minute brain scan.

You will be provided compensation for your time (approximately 1.5hrs - 2 hrs in total), and be able to view your own brainwaves.

### ELIGIBILITY

You may qualify as a study participant, if:

- You are 8 years or older
- You have normal hearing capabilities
- You are fluent in English
- You are able to sit still and focus for 6 minutes

### LOCATION:

- The study requires you to participate in-person at HealthTech Connex, Centre for Neurology Studies (located at City Centre 1, 13737 96th Avenue, Unit 204, Surrey, BC)

### PRINCIPAL INVESTIGATOR:

- Dr. Jan Venter - MD, MBChB, MFamMed, CCFP
